

## Biaxial testing equipment

### Measured values

- Dynamic load
- Testing frequency

### Description of facility

Biaxial testing equipment for flat test pieces from 100 mm \* 100 mm up to 1000 mm \* 1500 mm. With the four servo-hydraulic pistons tests with dynamic loads up to 1000 kN can be performed. The maximum testing frequency amounts to 20 Hz.

### Application

Biaxial testing of flat test pieces

### Contact

- Pouneh Ahmadi, DLR Institute of Materials Research, Tel: +49 2203 601 4244
- Jochen Krampe, Technology Marketing, Tel: +49 2203 601 3665, Fax: +49 2203 695689
