

## Ultrasonic test equipment for work pieces up to 400 mm x 1000 mm

### Measured values

- A -, B -, C and D-pictures

### Description of facility

The ultrasonic testing of FSW butt joints and T-joints is accomplished with high frequency ultrasonic equipment. Water is used as coupling medium. The system permits fast measurements of A -, B -, C and D-pictures in high resolution (up to 30000 measurements per second, specially designed ultrasonic probes).

### Application

Ultrasonic test

### Contact

- Prof. Dr.-Ing. Stefan Reh, Institute of Materials Research, Tel: +49 2203 601 3573, Fax: +49 2203 68936
- Jochen Krampe, Technology Marketing, Tel: +49 2203 601 3665, Fax: +49 2203 695689
